PROFESSIONAL SUMMARY

Detail-oriented Entry-Level Data Analyst with a strong foundation in transforming raw data into actionable business intelligence. Proficient in executing the full data analysis lifecycle — including data cleaning, Exploratory Data Analysis (EDA), and development of interactive dashboards. Skilled in Microsoft Excel, SQL, and Python (Pandas, NumPy) to identify trends, build KPI reports, and support data-driven decision-making.

EDUCATION

Bachelor of Technology, Computer Science Engineering — Maharana Institute of Professional Studies, Kanpur 2023 – 2027 (*Expected*)

Intermediate (Class XII) — Kendriya Vidyalaya No. 2 Chakeri, Kanpur *Completed: 2023*

High School (Class X) — Kendriya Vidyalaya No. 2 Chakeri, Kanpur *Completed: 2021*

PROJECTS

Road Accident Analysis Dashboard | GitHub

- Cleaned and prepared large-scale accident datasets to ensure data integrity for downstream analysis.
- Built an interactive Excel dashboard using Pivot Tables and advanced charts to visualize road safety trends.
- Defined and tracked KPI metrics covering accident frequency, vehicle types, and severity levels.
- Delivered data-driven recommendations aimed at improving road safety protocols for stakeholders.

Sales Performance Dashboard | GitHub

- Engineered a dynamic sales tracking system in Excel to evaluate regional and product category performance.
- Applied slicers and conditional formatting to enable real-time filtering and deep-dive analysis.
- Analyzed profit margins and sales cycles to surface actionable growth opportunities for business stakeholders.

Netflix Data Analytics Dashboard | GitHub

- Conducted EDA on Netflix content library metadata to identify audience preferences and consumption patterns.
- Processed and structured raw metadata to reveal content distribution trends across genres and release years.
- Created visual reports illustrating the correlation between content release timing and audience engagement behavior.

TECHNICAL SKILLS

Data Analysis: Exploratory Data Analysis (EDA), Trend Analysis, Data Interpretation, Business Analytics, KPI Reporting

Tools & Platforms: Microsoft Excel (Pivot Tables, Slicers, Conditional Formatting, Charts), SQL (Joins, Aggregate Functions, GROUP BY, Subqueries, Data Manipulation), Python (Pandas, NumPy), GitHub

Visualization: Interactive Dashboard Creation, KPI Metrics Reporting, Data Wrangling

CERTIFICATIONS

- Introduction to MS Excel — Simplilearn
- Data Visualization with Python — IBM
- Learn Python — Codecademy
